The Blackwell plant fleet is one of the largest earthmoving and mining fleets in the UK, totalling 125 primary units. These include:

- 12 Rigid Quarry Trucks with 100 tonne capacity.
- Over 40 Articulated Dump Trucks, ranging from 12 to 50 tonne capacity.
- 40 Excavators, ranging from 3 to 110 tonne operating weight.
- 15 Bulldozers, ranging from 10 to 50 tonne operating weight.
- 7 Loading Shovels, ranging from 20 to 100 tonne operating weight.

The fleet is reviewed on an annual basis to ensure that it meets the needs of the company's customers and has an average age of under four years. Equipment is maintained either by Blackwell's Plant and Engineering Department or under repair and maintenance arrangements with the equipment manufacturers and suppliers.
